JHC-3T Temperature and Humidity Meter

JHC-3T temperature and humidity meter is a handled instrument. It shows the environment's temperature and humidity by the digital format. It matched with the advanced circuit and structural design, it has the advantage like stable quality, high precision test, clearness digital display, convenient to use and precise test, it is widely used in production and scientific department such as electronics, medical treatment, hygiene, biological technology, aviation and spaceflight, it is an ideal instrument for pharmacy manufacturer and quality supervision department to carry out GMP rules.

Parameters:

LCD Display: temperature and humidity display at the same time

Time display

Large memory for storing data(1000 samples)

Data storage can be inquired.

Printed: data storage can be chosen to print out

Storage data can be deleted item by item

Temperature displayed in Centigrade and Fahrenheit degree

Test range: Temperature range: 5~40°C

Humidity: 10~90%RH

Work environment: Temperature: 0~50°C;

Humidity: 10~90%RH

Accuracy: Temperature: $\leq \pm 0.3^\circ\text{C}$

Humidity: $\leq \pm 2\% \text{RH}$ (25°C)

Display: LCD Digital display

Power supply: 7.4V Li-ion battery

Dimension: 200×90×30 (mm)

Temperature and humidity sensor size: $\Phi 18 \times 75$

Weight: 0.3 kg
